Conwy

**CLIMATE CHANGE POLICY**

The Town Council recognises the need for everyone in the community to minimise the risk of destroying our planet and to safeguard it's future.

It is proactive in ensuring that it employs sustainable methods of undertaking its role as a Town Council and takes into account the visual and non visual effect it has on the environment as a whole and the usage of the earth's natural resources.

The Town Council endeavours to lead by example:

- It ensures that electrical appliances in the office are switched off when not in use and that the use of energy is kept to a minimum.
- It recognises that trees are a valuable resource. The Town Council has a policy of emailing all agendas and minutes to members and only prints the minimum of items.
- It recycles as much as possible from its office and encourages others to do likewise.
- It is exploring ways of using renewable energy sources in its office and elsewhere.
- It actively encourages environmental projects with its community grants scheme.
